MAGIC MILK

This color changing milk experiment is a great way to teach your child about the effect soap has on germs! Using milk, dish soap, and food coloring, show your child how soap interacts with different materials!

Materials Needed:

Dish Soap
Milk
Food Coloring
Q-Tips
Large bowl/ dish

Directions:

1. Pour the milk into a large dish or bowl.
2. Place a few drops of food coloring into the bowl.
3. Dip a soap covered Q-tip into the bowl and watch how the soap interacts with the food coloring!
